INTRODUCTION

Welcome to the Road Safety Products from Nilkamal Limited, India's No. 1 company in Material Handling. These uniquely designed and well-engineered barriers, barricades, and other **traffic** movement regulation products facilitate easy handling and are also easy to install or **fit**. They are manufactured from premium grade UV stabilized virgin polyethylene material. Designed to interlock easily, Nilkamal barricades can readily form a wall. The barriers have been designed to withstand high wind pressure generated by fast-moving vehicles and are also more effective, more stable, and safer compared to conventional products such as drums, posts, and other forms of temporary barricades. Strips of retro-reflective sheets are also **affixed** on the barriers to enhancing visibility during the night.

SALIENT FEATURES

- Roto molded from LLDPE for higher uniform strength
- Customizable weights & sizes for large orders
- Choice of reflective sheet
